Quality software is important to a computer's success. Some go a lifetime without it. The Commodore 128 offers it *now!*

How can we do it? The Commodore 128 is fully compatible with Commodore 64 software—that's how. That's over 3,000 programs available right now. And that doesn't include all of the powerful CP/M programs on the market that can also be used.

But we're not through yet. In fact, the Commodore 128 is such a versatile and powerful personal computer, that a continuous flow of outstanding software promises to follow in the time ahead.

Take a look at what's in store for the Commodore 128. It's enough to give even the most sophisticated user all the computer software they'll ever need!

THE PERFECT FAMILY

Perfect Writer

Perfect Calc

Perfect Filer

COMMODORE

ONLY THE BEGINNING!!

SOFTWARE FOR COMMODORE 128

Jane™ — Absolutely, positively, the easiest way to use a computer. Typing letters, reports, doing mathematical calculations, developing budgets and creating mailing lists are easy with Jane. And all can be used together without complicated computer language because Jane's easy-to-understand pictures make using computers so very simple. Includes Janewrite, the word processor, Janecalc, the calculator/spreadsheet and Janelist, your custom database. A versatile way to begin any software library.

Perfect Writer™ — A professional word processing program that features pop-up on-screen menus, split-screen editing, automatic formatting options and more. In addition, there is also a pair of impressive editing options: **Perfect Speller,**™ a massive dictionary that automatically checks your document for errors, and **Perfect Thesaurus,**™ a great help when you're searching for the word that says exactly what you mean. Fully integrated with other Perfect products.

Perfect Calc™ — Evaluate your financial position today and plan where you will be tomorrow. The sophisticated spreadsheet package that's powerful enough to handle financial and statistical analyses in such areas as business and science. Includes pop-up on-screen menus, multiple spreadsheet storage and split-screen windows. Fully integrated with other Perfect products.

Perfect Filer™ — Now you can have all of your important information at your fingertips . . . lists, records, names and addresses. Improves your data management by providing you with a professional database that gives you data faster and easier than ever before. Transfer data directly to a **Perfect Calc**™ spreadsheet for even more versatility. On-screen pop-up menus and ready-to-use database forms highlight its features. Fully integrated with other Perfect products.

T/Maker
Timeworks
Total Learning Systems
Thorn EMI Computer Software
Viza Software

And it's no wonder such leading names are interested in working with us. Just look at some of the reactions that we've been hearing regarding the Commodore 128!

"The ability to run all the Commodore 64 software available would be especially important, since anyone owning a C-64 could upgrade to a more powerful machine without throwing their software away."

—*TPUG Magazine* March 1985

"To the already massive home software library of the Commodore 64, this machine adds the enormous CP/M library."

—*Creative Computing* April 1985

"Last year when users talked, Commodore listened. The Commodore 128 is proof of that."

—*RUN Magazine* May 1985

"The Commodore 128 lets people keep the investment they made in the Commodore 64 while at the same time stepping up to a faster, more flexible machine."

—Shelly Roberts, Editor *New York Commodore Interest Group Newsletter*

"I truly feel that the Commodore 128 will prove to be the most remarkable computer for the dollar this young industry has seen. (Commodore has) done an amazing job . . ."

—Randy Chase, Editor, *The Northwest Users Guide*

"The Commodore 128 (is) guaranteed to knock your socks off!"

—*Pittsburgh User Group Newsletter*

"Commodore deserves a big pat on the back (for the Commodore 128). It HAS been listening to its public and it appears to have done the right thing."

—*Western Indiana User Group Newsletter*
